

Md Shakib Al Hassan

Aspiring Prompt Engineer | MERN Stack Developer | AI Enthusiast

Dhaka, Bangladesh · shakibsah191@gmail.com · linkedin.com/in/md-shakib-al-hassan-7ba5ba391 · Open to Remote

PROFESSIONAL SUMMARY

Undergraduate Software Engineering student specializing in the **MERN stack** (MongoDB, Express.js, React.js, Node.js) with a growing focus on **Prompt Engineering** and AI integration. Experienced in building full-stack web applications and exploring LLM-based solutions for real-world problems such as fake news detection and intelligent recommendation systems. Passionate about designing effective prompts, evaluating AI outputs, and creating practical AI-powered features. Actively seeking remote opportunities in Prompt Engineering, AI Evaluation, and Full-Stack AI development.

PROJECTS

TruthGrad — AI-Powered Fake News Detection System

Full-Stack / AI Project · Team Collaboration

- Developed a system to detect and classify fake news using AI and natural language processing techniques.
- Contributed to the design and implementation of the web interface and backend logic for content analysis.
- Gained hands-on experience with data processing, model integration, and building practical AI applications for misinformation detection.
- Tech focus: JavaScript, React, Node.js, AI/ML concepts, and structured problem-solving for classification tasks.

Grandscount — Smart Scholarship Discovery Platform

MERN Stack Web Application

- Built a full-stack web platform that helps students discover and match with relevant scholarship opportunities.
- Implemented user-friendly search, filtering, and recommendation features to simplify the scholarship finding process.
- Designed responsive frontend with React and developed RESTful APIs using Node.js and Express.
- Focused on clean UI/UX and practical utility for students seeking educational funding solutions.

TECHNICAL SKILLS

Prompt Engineering & AI	Prompt Design, Large Language Models (LLMs), OpenAI API, AI Evaluation, RAG Concepts
Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design
Backend	Node.js, Express.js, REST APIs, MongoDB
Other	Java, Problem Solving, Git, Research Mindset, Team Collaboration

EDUCATION

Bachelor of Science in Software Engineering

Daffodil International University (DIU) · Dhaka, Bangladesh · 2023 – 2026 (Expected)

- Relevant focus areas: Web Development, Software Engineering Principles, Artificial Intelligence concepts, and Problem Solving.
- Currently conducting research related to AI applications while building practical full-stack and prompt engineering projects.

ADDITIONAL INFORMATION

- Actively learning advanced Prompt Engineering techniques, LLM integration, and RAG systems to build production-ready AI features.
- Open to remote roles in Prompt Engineering, AI Evaluation/RLHF, Full-Stack Development, and AI-powered product teams.
- Strong interest in combining clean software engineering practices with intelligent AI systems.
